PROFESSIONAL SUMMARY

Electrical and Computer Engineering student with professional DevOps experience and hands-on background in technical operations, inventory systems, troubleshooting, and team leadership. Experienced with GitHub, Jira, Azure SQL, Windows, macOS, and Linux environments, purchase orders, bills of lading, and high-volume inventory workflows.

EXPERIENCE

DevOps Engineer Intern — Jun 2026 - Aug 2026

CDK Global | Austin, TX

- Developed and deployed a critical systems health check program into production that remains live today.
- Supported a production software project using GitHub, Jira, Azure SQL, and automated testing/deployment workflows.
- Tracked development work, managed code changes, reviewed structured data, investigated issues, and documented project progress.
- Collaborated with engineering teams to troubleshoot technical problems and implement automated end-to-end testing.

Product Flow Shift Lead — Oct 2023 - Present

Best Buy | Nashua, NH

- Lead closing operations as a trusted keyholder, coordinating team workflow and ensuring store readiness.
- Manage inventory and product-flow operations using internal systems to compile and process customer orders, purchase orders, and shipment information.
- Work with bills of lading and maintain accurate inventory and order records in a high-volume environment.

EDUCATION
